

UNEARTHING THE ENVIRONMENTAL IMPACT ON HUMAN ACTIVITY:
A GLOBAL CO2 EMISSION

Global median

Increased use of Fossil Fuel

Transportation causes 15 percent of CO2 emission

Some industrial process

Clearing of Forest

Don't burn oil and coal

Serious and threatening activities of human

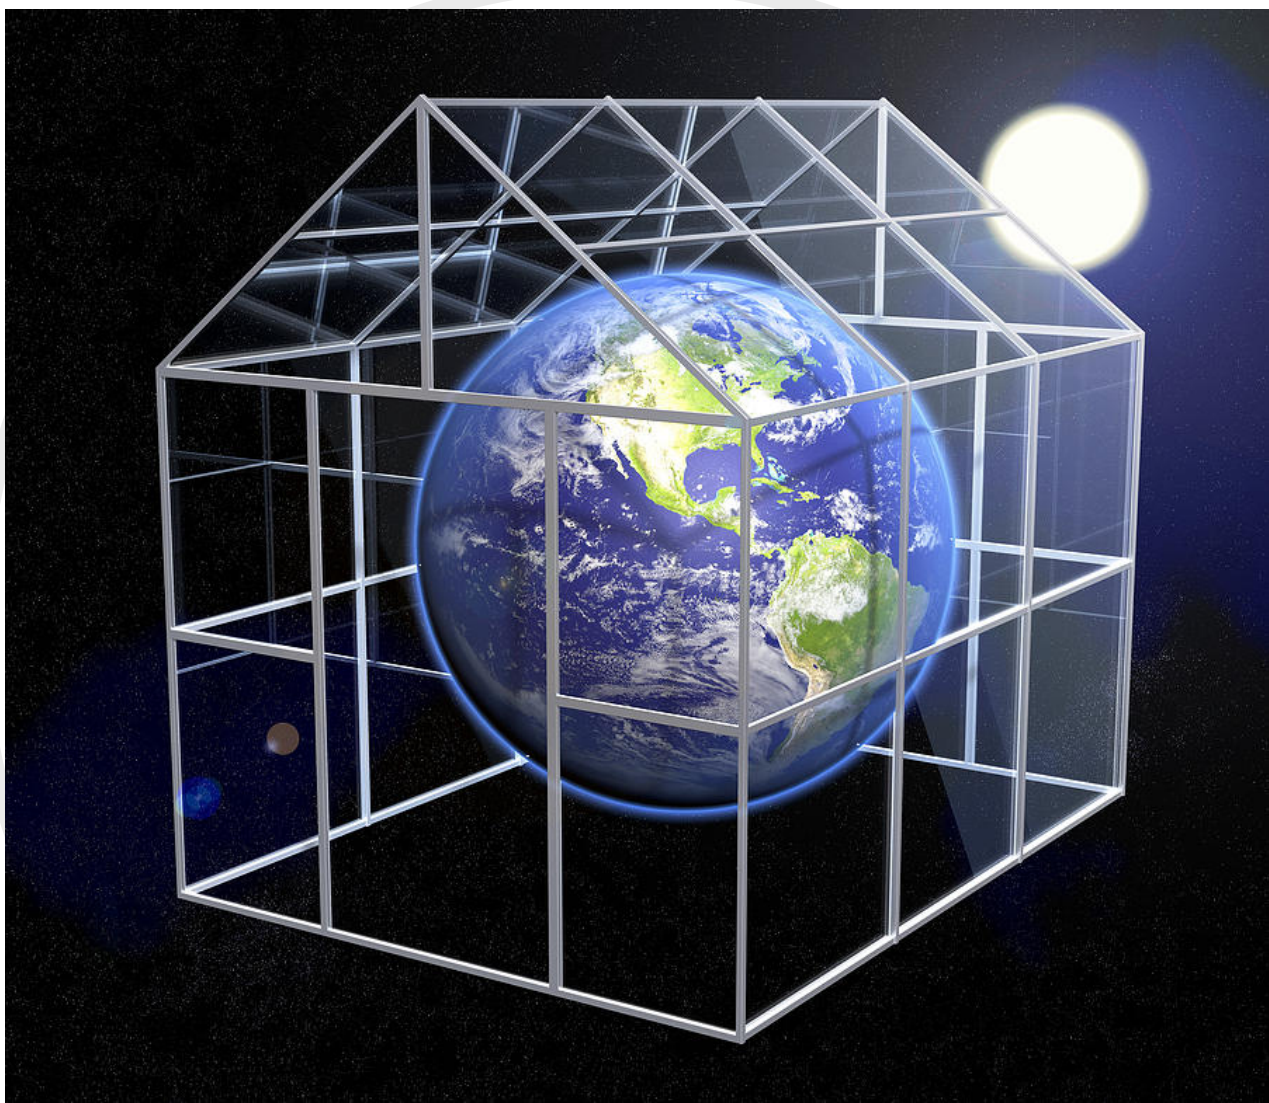

Affects our economy severely

High carbon Foot print

Reduces the labour productivity

Lowers agricultural yield

Raising awareness about CO2 emission

Increase renewable energy generation

National clean air programme

Great stress on thinking this

Major Fear about Future.

Development of solar Fuels and chemicals

Reduce your carbon Foot print

Severe anger towards the human race.

Worry about this kind of situation.

Low carbon vehicle

Planting trees is the major solution to this because TREES are the major CO2 trapper

Non fossil sources to generate power
